
CAREER PROFILE

Computer Science and Cybersecurity candidate who has a strong foundation in software engineering and programming principles across multiple platforms. Strong analytical mind with the ability to solve complex problems. Ability to learn new concepts and technologies quickly with a consistent record of meeting project deadlines. Experienced in using various red team and penetration testing tools for use in enumeration and exploitation. Interests in reverse engineering, penetration testing, malware analysis, and system hardening.

Programming Languages: C++, C, Python, Assembly, Powershell, Bash, Rust, Java

Technical Skills: Nessus, GVM, Burp Suite, Hashcat, Ghidra, Autopsy, Wireshark, Nmap, Wazuh, MetaSploit, GCP, Kali, IPTables, Postman

EDUCATION

BAYLOR UNIVERSITY- Waco, TX

December 2026

Bachelor of Science in Computer Science with a Concentration in Cybersecurity

- GPA: 3.67
- Relevant Coursework: Networking, Advanced Cybersecurity, Cryptology, Operating Systems, Systems Programming, Foundations of Computing, Software Engineering II, Algorithms

EXPERIENCE

Baylor University – Waco, TX

September 2024 – Present

Cybersecurity Research Assistant

- Developed a cybersecurity summer camp with a team of 8 to teach 21 students key cyber skills and technologies, raising awareness of cybersecurity careers
- Utilized Wazuh to set up log aggregation and basic threat detection on a network, providing hands-on experience that improved campers' ability to detect and respond to threats

City Of Las Vegas – Las Vegas, NV

Summer 2023

Cybersecurity Analyst Intern

- Collaborated with a team of 7 members to monitor and protect the City of Las Vegas network, reducing potential security incidents through proactive detection and response
- Investigated alerts from IDS software to ensure proper integrity of the network, preventing false positives from escalating and identifying genuine threats in real time
- Executed a phishing campaign to identify improperly trained users, discovering 10% of employees requiring additional training to strengthen overall security posture

ADDITIONAL

- Captain of Baylor's Competitive Penetration Testing Team (CPTC)
- CompTIA Security+
- Placed 9th out of over 1000 teams in the National Cyber League
 - Web App Exploitation Lead – utilized BurpSuite and Postman to fuzz and exploit vulnerable endpoints on given websites
- AD Lead for Baylor's CCDC team
- Homebrewed DNS P2P Server in Rust
 - Completed with a team of 3 members. Supports both IPv4 and IPv6 connections and handles majority of DNS records.
 - Implements a DNS resolver that has an internal map of cached domains. If a domain is not in the cache, it will scrape the domain-IP translation from the internet.
